Kelly,

Thank you for the warning regarding the review of the 2021 sampling plan. I will start working on it on Friday or Monday and have the required files.

My colleague was able to create an application that will allow us to evaluate changes in pumping with the current version of the KT3D\_H2O software, a functionality we were using at the Verona site in the past. We therefore have all the tools.

Sorry for the delayed response, I was away from the office for our long weekend, a week before Memorial Day, here in Canada.

Dominique

**Subject:** Verona Well Field - 2020 annual monitoring report review

Hi Dominique,

I'm still waiting for comments from EGLE on the PRP's 2020 Annual Monitoring Report - they've let me know that they won't have them ready for another couple of weeks. Please review the report without their comments since EPA will need to provide the PRPs with our approval of their 2021 sampling plan (Table 9 of the report) soon. If you need me to reshare the report or excel database or have any questions let me know.

Also, how has the effort been to bring the older version of the model used at Verona up to date?

Best,

Kelly Poulos
